

THE HIDDEN BENEFITS OF Cloud Services

Cloud-based communications, infrastructure and applications are the great equalizer, offering small and medium businesses (SMBs) access to enterprise-class services at subscription prices. Cloud's operational and financial advantages are well publicized and verified by record adoption among SMBs. But enterprise IT decision-makers have discovered the "hidden" benefits of cloud services that SMBs can take advantage of, too.

WELL-KNOWN REASONS for Choosing Cloud Services

Convert equipment costs from CapEx to OpEx

Scale on-demand with your business

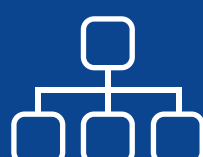

Seamlessly integrate mobile and remote workers

Drive improvements in customer experience and satisfaction

Create competitive advantage by unifying communications

Future-proof vital infrastructure with automatic upgrades

Offload management, so you can focus on your business

WELL-KEPT SECRETS for Choosing Cloud Services

Stay up and running when there's an outage in one or all of your locations

Quickly reroute inbound calls to other locations or even mobile devices

Automatically updated security protections

Leverage built-in redundancy and backups to keep your data and apps secure and accessible

Transform your business' disaster recovery plan into a business continuity plan

WELL-INFORMED STEPS for Sourcing Cloud Services

You don't have to take on cloud sourcing and planning by yourself. Avega Inc can help you plan a cloud strategy that improves collaboration, reduces costs and helps you plan for business continuity and disaster recovery.
